

Companion	Beneficial to	benefits from	Description	Incompatibles
Alfalfa	Cotton		Adds Nitrogen & Minerals to soil	Fava Beans & Tomatoes
Alliums	Brassicas, Capsicum, Peppers, Carrots, Fruit Trees, Nightshades, Tomatoes	African Spider Plants, Carrots, Marigolds, Mints, Tomatoes	Alliums: Garlic, Leeks, Onions, & Shallots.	Beans, Parsley, Peas
Alyssum	Grapes, Lettuce		Alyssum attracts syrphidae which prey on aphids	
Amaranth	Cabbage, Corn	Beans	Attracts ground beetles that eat pests	
Anise		Coriander	Host plant for predatory wasps	
Apple		Chives, Clover, Comfrey, Daffodils, Garlic, Leeks, Nasturnum	Avoid planting by cedar trees (apple-cedar rust) Walnut trees inhibit apple tree growth	Cedar, Walnut Hawthorn Trees & Potatoes
Apricot			Can get fungus from Peppers	Peppers
Artichoke	Sunflower, Tarragon			None
Asparagus	Parsley, Tomatoes	Aster family flowers, Basil, Comfrey, Coriander, Dill, Marigolds, Nasturtiums, Parsley, Tomatoes	If combined with Basil it easily attracts Lady Bugs	Garlic, Gladiolas, Onion, Potatoes
Baby's Breath			Attracts syrphidae that prey on aphids	
Basil	Asparagus, Tomatoes, Beans, Broccoli, B-Sprouts, Cabbage, Capsicum, Pepper, Cauliflower, Collard, Kale, Grapes, Marigold, Oregano, Peppers, Petunias, Tomatoes	Anise, Chamomile	Basil makes tomatoes taste better. Chamomile & Anise increase essential oils in Basil. Basil repels aphids, flies, mites, & mosquitoes. Effective against beetles & Tomato hornworms.	Rue, Sage
Beans	Complements, most herbs & Veggies: Carrot, Cucumber, Lettuce, Beets, Cabbage, Chards, Corn, Dill, Eggplant, grapes, okra, peas, potatoes, spinach	Beets, Borage, Cabbage, Carrots, Cauliflower, Corn, Cucumbers, Lacy Phacelia, Larkspur, Lettuce, Lovage, Marigolds, Mustard, Onion, Peppermint, Radish, Rosemary, Squash, Summer Savory	Beans add nitrogen to the soil. Potatoes & Summer Savory repel bean beetles	Alliums, Chili Peppers, Garlic, Gladiolas, Onions, Sunflower, Tomatoes.
Bee Balm	Tomatoes		Attracts Bees	
Beets, Beetroot	Brassicas, Broccoli, Bush Beans, Kohlrabi, Lettuce, Onions.	Most Brassicas, Bush Beans, Catnip, Garlic, Kohlrabi, Lettuce, Mint, Onions.	Great for adding minerals to soil. In compost it adds magnesium to the ground.	Runner or Pole Beans.
Blueberries		Bay Laurel, Clover, Dew Berries, Oak Trees, Pine Trees, Strawberries, Yarrow	To repel insects, plant Bay Laurel, & Yarrow. Dewberries & Strawberries create good ground cover.	Tomatoes
Borage	Beans, Cabbage, Cucurbits, Fruit Trees, Tomatoes, Strawberries.		improves the flavor of Strawberries, increases disease-resistance of nearby plants, adds minerals to the soil, repels tomato worms	None

Companion	Beneficial to	benefits from	Description	Incompatibles
Brassicas	Beets, Cereals, Onions, Potatoes	Aromatic plants, Beets, Spinach, Chard	Includes Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Chinese Cabbage, Kohlrabi, Radish, Turnip.	Broccoli is incompatible with grapes, lettuce, & rue. Cabbage family incompatible with dill, pole beans, strawberries, & tomatoes
California Poppy			Attracts syrphidae, which prey on aphids	
Caraway	Strawberries		Improves soil for shallow rooted crops, and attracts wasps to flowers	Dill & Fennel
Carrots	Alums, Beans, Leeks, Lettuce, Onion Family, Passion Fruit, Pea, Rosemary, Sage, Tomato	Alums, Beans, Flax, Lettuce, Rosemary, Sage, Shallots, Wormwood	Aromatic plants & Alums repel carrot flies. Flax produces oil that protects the roots. Carrots attract beneficial insects when they flower.	Caraway, Celery, Dill, Parsnips.
Catnip	Eggplants		Repels ants, aphids, flea beetles, Jap beetles, mice, squash, & more. bugs, weevils	
Cauliflower	Beans, Celery, Peas, Spinach	Chinese Cabbage, Marigolds, Peas, Spinach, Sunflower.	Each Cauliflower row planted alternating W/Spinach @ 24In will improve both.	
Celery	Beans, Cabbage, Onion, Cucumber, Leek, Spinach, Nasturnum.			Carrot, Corn, Parsley, Parsnips.
Chamomile	Aromatic Herbs, Cabbages, Cucumbers, Onions.		Improves Flavor of Onions, & Oil Production of other herbs.	
Chard	Broccoli, Passion Fruit.			
Chervil	Broccoli, Lettuce			Radish
Chives	Apples, Broccoli, Cabbage, Carrots, Grapes, Mustard, Roses, Tomatoes		Growing Chives at base of Apple Tree for 3 years will prevent apple scab. Repels aphids and green flies, prevents mildew,	Beans, Peas.
Chrysanthemum			Repels Jap Beetles, & Kills Harmful Nematodes.	
Cilantro	Anise, Cabbage, Lettuce, Spinach, Tomato.	Beans, Peas.	Cilantro will deter hoverflies from cabbage. Will cross pollinate with Dill & may ruin both.	Dill.
Cucurbits	Corn	Corn, Grain, Sorghum	Melons, Pumpkins, Squash	None
Eggplant	Beans, Capsicum Pepper, Passion Fruit, Tomatoes	Catnip, Dill, Green, Beans, Marigold, Mints, Redroot, Pigweed, Tarragon, Thyme	French Marigolds will deter nematodes in Eggplants	Fennel
Fennel	Dill	Dill	Inhibits the growth of most garden plants.	Most plants

Companion	Beneficial to	benefits from	Description	Incompatibles
Fruit Trees	None	Alliums, Borage, Dandelions, Lemon Balm, Marigolds, Marjoram, Mustard, Tansy	Apple, Pear, Peach, Apricot, Etc.	None
Garlic	Apple tree, Celery, Chinese Cabbage, Collard, Lettuce, Pear, Peas, Potatoes, Roses, Tomato	Tarragon	Garlic promotes accumulation of sulfur, which is a natural fungicide.	Cabbage, Grapes & Peas
Geraniums	Corn, Grapes, Peppers, Roses		Can be used in trap cropping to deter pests. Distracts leafhoppers	Eggplants, Nightshades, Tomatoes
Grapes		Alyssum, Basil, Beans, Blackberries, Chives, Clover, Geraniums, Hyssop, Mustard, Oregano	Clover & Grapes together increase the soil fertility	Cabbages, Garlic, Radishes
Horseradish	Potatoes		Horseradish helps potatoes become more disease resistant & repels blister beetles & potato bugs!	
Hyssop	Brassicas, Cabbage, Grapes		Repels cabbage moths & flea beetles. Rubbed on hive brings bees back. Stimulates Grape growth.	Radishes
Kohlrabi	Aromatic plants, Beets, Cucumber, Onion	Beets & Cucumber.		
Larkspur	Beans, Cabbage			
Lavender	Basil, Brassicas, Chamomile, Fruit Trees, Lemon Balm, Lettuce, Marjoram, Onions, Oregano, Sage, Squash, Thyme, Tomatoes.		Lavender Flowers provide nectar & attract beneficial insects. Repels codling moths & whiteflies.	
Leek	Carrot, Celery, Onion, Passion Fruit, Tomato.	Carrots, Clover	Leeks can repel carrot flies.	Legumes, Swiss Chard
Lemon Grass	Eggplant		Known to reduce cutworms in eggplant.	
Lettuce	Beans, Beets, Broccoli, Carrot, Chinese, Okra, Onions, Radish, Passion Fruit	Alyssum, Beans, Beets, Broccoli, Carrots, Cucumber, Cilantro, Dill, Kohlrabi, Nasturnums, Onions, Radish, Strawberries, Thyme.	Intercropping Lettuce & Broccoli has proven to create more yield. Mints are known to repel slugs: The worst pest against cabbages & lettuce.	Cabbage, Celery, Cress, Parsley.
Lovage	Beans		Lovage considered "Magic Bullet" of companion planting. It improves the health of almost all pants.	Rhubarb
Lupin: Perennial Flower	Brassica, Cucurbits, Dill, Lettuce, Rosemary, Strawberry.	Summer Savory	Lupin is a wildflower that is a legume. It hosts nitrogen-fixing bacteria that fertilize the soil for surrounding plants.	Tomatoes & other Solanaceae

Companion	Beneficial to	benefits from	Description	Incompatibles
French Marigolds			Good pest deterrents & works well against insects & nematodes. French Marigolds produce a chemical that's a natural pesticide. Mexican Marigolds do the same but may inhibit growth of some herbs.	Beans & Cabbage.
Marjoram	Helps lots of plants: Alliums, Brassicas, Cucurbits, Peppers, Potatoes, Roses, Tomatoes & Zucchini.		Known to improve the flavor of many herbs & veggies. Plant anywhere to benefit the entire garden.	
Melons	Corn, Nasturtium, Radish.	Chamomile, Oregano, Pigweed, Summer Savory, Sow Thistle.	Oregano helps protect Melons from pests.	Potato
Mint	Cabbages, Tomatoes.		Mint is know to deter white cabbage moths. Take note that mint is invasive and can crowd out other plants.	
Mustard	Beans, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Fruit Trees, Grapes, Radish, Turnips.		Mustard repels various pests & acts as a trap crop for aphids.	
Nasturtium	Beans, Brassicas, Cabbage, Cucumber, Fruit Trees, Radish, Squash, Tomatoes.		Nasturtiums attract beneficial insects & deter other pests. It is also used as a trap crop for Aphids.	Cauliflower
Nightshades		Alliums, Carrots, Mints	Nightshades include Chili Peppers, Bell Peppers, Eggplants, Potatoes, Tobacco, Tomatoes, & Others.	Beans, Black Walnuts, Brassicas, Corn, Dill, & Fennel.
Okra	Lettuce, Peppers, Eggplants, Basil, Cucumbers, Melons, Black-eyed Peas		Peas are less bothered by aphids when planted near Okra.	
Onion Family	Beans, Beets, Brassicas, Broccoli, Cabbage, Carrots, Cucumber, Lettuce, Passion Fruit, Peppers, Strawberry	Brassicas, Beets, Carrots, Dill, Chamomile, Lettuce, Marigolds, Mints, Strawberries, Summer Savory, Tomatoes.	Intercropping Onions with carrots & Leeks deters Carrot & Onion Flies. Onions also protect Strawberries from disease. Green onions good with Chinese Cabbage.	Asparagus, Beans, Lentils, Gladiolus, Peas.
Oregano	Beans, Broccoli, Cabbage, Cauliflower, Cucumbers, Grapes, Peppers, Pumpkin, Tomatoes.	Basil	Oregano improves the flavor of cabbage. It also provides, the needed humidity & ground cover for peppers. Also attracts beneficial insects (syrphidae) that prey on aphids.	
Pansy	Alliums, Onion, Rose.	Roses	A nicely scented flower that attracts ants	
Parsley	Asparagus, Corn, Rose, Tomato	Apple, Asparagus, Rose	Parsley attracts insects that prey on Tomatoes.	Alliums, Mint, Lettuce
Parsnip	Fruit Trees		Use three roots soaked in 1 liter of water overnight to spray on fruit trees. When left to seed attract insects that prey on codling moth & light brown apple moth.	

Companion	Beneficial to	benefits from	Description	Incompatibles
Passion Fruit		Beets, Carrots, Eggplants, Leeks, Lettuce, Onions, Potatoes, Spinach, Strawberries, Swiss Chard.		Cowpeas, Cucurbits, Maize, Okra, Sorghum, Sweet Potatoes.
Pea	Brassicas, Cauliflower, Garlic, Turnip.	Cauliflower, Garlic, Mints, Turnip.	Peas are good in nitrogen fixation of the soil.	Gladiolus, Onion Family, Potato.
Pennyroyal	Broccoli, Brussels Sprouts, Cabbage		Deters ants, aphids, cabbage maggots, fleas, & ticks. Poisonous to cats.	
Pepper	Okra	Basil, Beans, Crimson Clover, Field Mustard, Geraniums, Marjoram, Okra, Onion Family, Petunias, Sunflowers, Tomatoes.	Pepper plants grow well in high humidity. Planting along side dense leaf ground cover IE: Basil & Marjoram proves beneficial. Tomatoes, & Sunflowers shade peppers improving humidity. Sunflowers lower Thripes populations also.	Beans, Brussels Sprouts, Cabbage, Kale.
Peppermint	Alliums, Brassicas, Cabbage, Peas, Tomatoes.		Repels Cabbage Flies.	
Petunias	Asparagus, Cucumbers, Pumpkins, Squash, Tomato.		Repels many garden pests: Aphids, Asparagus beetles, Leafhoppers, Mexican bean beetles, & Tomatoes Worms.	
Potato	Beans, Cabbage Family, Corn, Passion Fruit, Peas.	Beans, Comfrey, Clover, Garlic, Dead Nettle, Horseradish, Marigolds, Onion, Peas, Thyme.	Horseradish around edge of Potato patch will provide optimum protection from pests. Comfrey protects from scab, fungal disease, & Garlic helps with potato blight. Peas reduce Colorado Potato beetles. Pumpkin can be planted using the three sisters technique (Pumpkin, Corn, Beans). Oregano helps against pests. Radishes are good trap crop against flea beetles. Nasturnums repel squash bugs.	Cucumber, Fennel, Kohlrabi, Melons, Parsnip, Pumpkin, Squash, Sunflower, Swede/Rutabaga, Tomato, Turnip.
Pumpkin	Corn, Beans.	Buckwheat, Catnip, Jimson Weed, Nasturnum, Oregano, Radishes, Tansy.		Potatoes
Radish	Beans, Cucumber, Eggplant, Lettuce, Peas, Pole Beans, Squash.	Chervil, Lettuce, Nasturtium	Radish known to taste better when grown with lettuce. Trap crop for Flea Beetles	Grapes, Hyssop.
Rhubarb	Beans, Cabbage, Columbine Flowers, Garlic, Onion, Roses		Rhubarb Deters Red Spider Mites from Columbine Flowers.	
Rose		Chives, Garlic, Marigold		
Rosemary	Beans, Cabbage, Carrots, Sage.		Rosemary naturally deters pests such as bean beetles, cabbage moths& carrot flies.	
Sage	Brassicas, Beans, Brussels Sprouts, Cabbage, Carrots, Marjoram, Rosemary, Strawberries, Tomatoes.		Sage repels pests: cabbage moths, carrot flies & ticks.	
Southernwood	Brassicas, Cabbage, Fruit Trees.		Deters Pests & BEES. Can grow out of control easily.	

Companion	Beneficial to	benefits from	Description	Incompatibles
Soybean		Corn, Snap Beans, Sunflower	Plant corn, mungbean, & sunflower to deter aphids & for Mexican bean beetles use Snap Beans	
Spearmint	Alliums, Brassicas, Cabbage, Peas Tomatoes.		Known to control ants & aphids.	
Spinach	Brassicas, Cauliflower, Passion Fruit	Beans, Cauliflower, Peas, Strawberries.	Spinach & Cauliflower benefit mutually. For natural shade for Spinach plant next to Beans & Peas.	
Squash	Beans, Corn, Okra	Beans, Borage, Buckwheat, Catnip, Marigold, Nasturnum, Radish, Tansy.	Uses 3 sisters planting technique. Marigolds repels cucumber beetles & Squash bugs. Use Radish for trap crop.	
Strawberry	Bush Beans, Lettuce, Onions, Spinach, Passion Fruit.	Beans, Borage, Caraway, Lupin, Onion, Sage, Thyme		Brassicas, Bush/Bramble Fruits, Mums, Eggplant, Melons, Mint, Okra, Peppers, Potatoes, Roses, Stone Fruits, Tomatoes.
Stinging Nettle	Angelica, Archangelica, Broccoli, Chamomile, Marjoram, Mint, Peppermint, Sage, Tomatoes, Valerian		Stinging Nettle is known to repel or distract aphids.	
Summer Savory	Beans, Garlic, Melon, Onions		Summer Savory helps improve the flavor of beans and onions. It also protects plants from bean beetles while being much preferred by honeybees. It also delays the germination of specific foul herbs.	
Sunflower	Corn, Cucumber, Peppers, Soybeans, Squash, Tomatoes.		Sunflowers act as decoy plants to deter aphids away from corn. Ants also herd aphids on to sunflowers, keeping them away from surrounding plants. It also attracts beneficial creatures such as hummingbirds, which eat whiteflies. It is also used in trap cropping to keep Thripes off from bell peppers.	Pole Beans & Potatoes
Swan Plants		Sunflower	Swan Plants attract Monarch Butterflies during the middle of spring to summer.	
Sweet Pea		Brassicas, Silverbeet, Spinach.	Beautiful climbing plant that grows every year.	
Sweet Potato	Okra	Okra	Sweet Potato & Okra are mutually beneficial.	

Companion	Beneficial to	benefits from	Description	Incompatibles
Tansy	Beans, Brassicas, Corn, Cucurbits, Fruit Trees, Raspberries, Roses.			Tansy naturally deters many pests such as ants, flying insects, Japanese beetles, mice, squash bugs, and striped cucumber beetles. Do take note that Tansy is toxic to livestock and tends to be invasive.
Tarragon	Eggplant & most vegetables		Tarragon is ideal to be planted all throughout the garden since it can naturally repel many pests because of its scent. It is also known as a Nurse Plant because it improves the flavor and growth of crops around it.	
Thyme	Brassicas, Brussels Sprouts, Cabbage, Eggplant, Potatoes, Strawberries, Tomatoes,		Thyme attracts beneficial insects such as syrphidae which preys on pests such as aphids	
Tomato	Asparagus, Brassicas, Broccoli, Cabbages, Celery, Peppers, Roses	Alliums, Asparagus, Barley, Basil, Beans, Bee Balm, Borage, Carrot, Celery, Chives, Corn, Coriander, Dill, Eggplant, Fenugreek, Garlic, Geraniums, Leeks, Marigold, Mints, Mustard, Nasturtium, Okra, Oregano, Parsley, Petunias, Sage, Thyme	Growing tomatoes with basil around ten inches apart can increase the yield of tomatoes. Take note that chili peppers planted near tomatoes in greenhouses increases pests such as tomato whiteflies. Dill also attracts tomato hornworm. Black walnuts are also known to inhibit Tomato growth.	Alfalfa, Black Walnut, Brassicas, Beetroot, Chili Peppers, Corn, Dill, Fennel, Peas, Potatoes, Rosemary
Turnip	Broccoli, Peas	Hairy Vetch, Peas	Turnips and peas mutually benefit each other. Turnip is also good as a trap crop for broccoli.	Hedge Mustard, Knotweed
Walnut Tree	Crown vetch, European Alder, Hairy Vetch, Sericea lespedeza		Take note that black walnut is harmful to all nightshade plants which include belladonna, capsicum, eggplant.	Apple Trees & Grasses
Worm Wood	Brassicas, Carrots		When planted as a border, it naturally deters animals and other pests such as black flea beetles and cabbageworms. Take note that wormwood should be planted with caution since it contains toxins, which are harmful to vegetables.	Beans & Peas.
Yarrow	Aromatic plants and many other plants		If yarrow is planted near aromatic herbs, it increases the production of essential oils. It also has natural insect repelling abilities. Using yarrow speeds up breakdown of compost. It also attracts syrphidae, which preys on aphids.	
Zinnias	Beans, Peppers, & Tomatoes.		Zinnia attracts pollinators and hummingbirds, which eat whiteflies.
